CHAMOIS LINEN PROTECTOR

Absorbs moisture and has quick drying surface - specially constructed fibres give chamois surface fabric the ability to channel fluids away from the surface leaving it drier faster - Triton fibre is a super absorbent compact soaker designed to help prevent wet back under pressure - two sizes available with 1.5 litre or 2.4 litre fluid capacity

ROSIE LINEN PROTECTOR

Economical alternative to top of the line stay dry linen protectors - soft comfortable face fabric contributes to a stay dry surface to help promote good skin care - ultra compact super absorbent inner soaker ensures excellent containment of fluids - is durable and resistant to stains - will last longer than cotton base pads - one size available

ODOUR BUSTER ANTIBACTERIAL BED PAD

Made with fibre technology - contains anti-microbial additives locked inside micro sized reservoirs within fibre that dramatically reduce odour for up to 200 washes, safeguarding patients and staff from bacteria growth - fabrics containing Amicor Plus are made to last - results from tests show that the 'Odour Buster' will not allow bacteria such as Staphylococcus Aureus and Kebsiella Pneumoniae to grow, therefore, we are likely to see a drop in the development of bed sores - single, double and queen size available

LINEN SKIPS

Available as single or double - powder coated or stainless steel - 100mm ball bearing swivel castors - push handle - 3/4 shelf - choice of no lid, manual lid or foot operated lid - linen bags available to suit - complies with OH & S standards
