## OXFORD MIDI HOIST

Easy to handle - suitable for home and residence use - easy to dismantle for storage and transport - two different hoisting ranges easily changed by moving position of cylinder - electric model has high battery capacity allowing you 60 double movements (up and down) - electric model has double safety button and battery charge indicator light

### Specifications

Batteries (electric model)	2 x 12V rechargeable
Battery capacity	4.5amps
Working capacity	150kg
Length (total)	119cm min, 125cm max
Height (total)	125cm min, 185cm max
Spreader bar height	45cm min (55cm on hydraulic) / 160cm max
Turning circle	115cm
Legs open - outside width	107cm
- inside width	99cm
Legs closed - outside width	64cm
- inside width	56cm
Leg height (total)	10.5cm
Clearance over floor	3cm
Castors	front 7.5cm rear 10cm
Weights - mast & boom	18.5kg (19.5kg on hydraulic)
- base	17kg
- batteries	3.7kg

## OXFORD ADVANCE PATIENT LIFTER

Aluminium frame - swan neck design allows lift to get close to even the widest obstacles - over sized handle for increased control - push footpad reduces the force needed to initiate movement - foot operated leg spreading mechanism requires no bending to operate - compact yet able to perform a range of transfers - patent pending triangular folded design allows lift to securely stand unaided - can be folded or separated for easy transport - no tools required to fold

### Specifications

Batteries (electric model)	2 x 12V rechargeable
Battery capacity	3.2amps
Working capacity	155kg
Length (total)	120cm min, 125cm max
Height (total)	135cm min, 184.5cm max
Spreader bar height	39cm min, 164cm max
Turning circle	104cm
Legs open - outside width	116cm
- inside width	111cm
Legs closed - outside width	64cm
- inside width	55cm
Leg height (total)	12cm
Clearance over floor	3cm
Castors	front twin 7.5cm rear braked 10cm
Weight - mast, base & boom assembly	28.9kg
Folded dimensions	
- height	47cm
- depth	125cm
- width	55cm

Easy to fold

## GULDMANN CEILING HOISTS

All have safety features and warning systems - all automatically stop at top and bottom of travel - all have emergency stop and emergency lowering - battery switches off automatically when voltage drops below 17V - all have hand controls with optional infra-red control - lift range for all is 2 metres

GH2 / GH2 HD  
(suspended from rail system)

Batteries	2 x 12V / 4Ah
Working capacity	200 / 250kg
Weight	8.7kg
Charging time	8hrs

DH1000  
(relocatable between rails)

Batteries	2 x 12V / 2.7Ah
Working capacity	200kg
Weight	11.5kg
Charging time	6hrs

DH4000  
(suspended from rail system)

Batteries	4 x 12V / 4Ah
Working capacity	455kg
Weight	29kg
Charging time	8hrs

## GULDMANN SLINGS

Slings make lifting and transferring people safe and comfortable - have padded legs and back - can be washed many times at high temperature (85C) - retain shape for sling life - repellent to dirt - available in polyester or net - 7 sizes ranging from kids to XXL - weight capacity of 200kg - easy to use

BASIC SLING

**Function** - supports whole body (excluding head), for lifting persons who have head control, but with or without body control

**Suitable for** - lifting to and from a seated or half-seated position

LOW SLING

**Function** - supports whole body up to shoulder height, for lifting persons with head and body control

**Suitable for** - lifting to and from a seated position

HIGH SLING

**Function** - supports whole body (including head), for lifting persons who have little control over their head and body

**Suitable for** - lifting to and from a lying position and/or a seated position
